Horario: 9am a 4pm

OCTAVO BÁSICO

El objetivo de esta guía es que los estudiantes reconozcan la importancia del reciclaje en el cuidado del medio ambiente. Para dudas que tengan pueden escribirme un correo a esta dirección: yorka.sepulveda.pulmahue@gmail.com, escribiendo en el asunto el nombre de él o la estudiante y su curso, el horario para correos es de 9am a 4pm. Plazo de entrega: viernes 06 de noviembre hasta las 2pm

O.A: Identificar información en textos sobre el reciclaje y la importancia en el cuidado del medio ambiente

1. Read the text. Then write TRUE (T) or FALSE (F). If false, correct the statement.

Recycling

Half of the planet's population lives on cities and consumes 75% of the world's resources, creating most of its pollution.

This means that governments need to create effective recycling plans. In cities where recycling is successful, it is possible to recycle 95% of garbage and litter. It takes 30-40% less energy to make paper from recycled materials than it does to make it from trees.

At present, people know the importance of recycling and many countries recycle much of their waste. In the future many other cities will start recycling programs.

Water shortage

Nowadays, 31 don't have enough water. With the increased population, the demand for fresh water is becoming greater and water reserves are decreasing. The rise in temperatures is also contributing to water problems. It is estimated that within 25 years 50 countries will not have enough water. Africa and Asia will be the most affected continents. In addition, approximately half of the world's largest rivers are much polluted.

a) In places where recycling is successful, it is important to recycle 95% of litter and garbage

b) All the countries around the world recycle their waste

c) The rise in temperatures is one solution to water problems

d) Within 50 years 25 countries won't have water

VOCABULARY

2. Complete the text with the words in the box

recycle – warming - forest - garbage - clean - fumes - pollution - cutting -picking - litter

It's **Your** Planet

Why don't you care about your world? Maybe you think there is nothing you can do to stop global
1 You say that you can't stop people from 2 down trees in the
3 You can't control all the 4 from traffic and factories that cause
5 in the atmosphere. But you can do little things yourself. Can you say that you never drop
6 on the streets? You could always try 7 up the things that other people drop,
especially in our parks. They might learn from your actions.

Just think of all the money we'll save if we don't need to pay people to 8 up the streets.
And there's no need to put your empty soda cans in the 9 for someone to collect every week.
Why not 10 your cans, bottles, plastic and paper? Then we'll all have a cleaner planet.
